Entity Presentation (We are)

The Directorate-General for Research and Innovation's mission is to develop and implement the European research and innovation policy with a view to achieving European policy priorities, and

in particular, the European Green Deal. The DG supports research and innovation through European Framework Programmes, coordinates and supports national and regional research and innovation programmes, contributes to the creation of the European Research Area and supports European organisations and researchers in their cooperation at international level.

Unit RTD.B2, “Bioeconomy & Food systems”, supports the transition to the Healthy Planet, which is climate neutral by 2050, and operates within safe planetary boundaries. The unit coordinates the implementation and further development of the EU Bioeconomy Strategy. Its activities contribute to future-proofing our food systems by engaging communities and delivering climate-neutral, circular, sustainable and innovative solutions that provide nutritious and healthy food and diets for all, and enabling place-based fair transition pathways towards sustainable circular bioeconomies thus accelerating their deployment across Europe.

The successful candidate will also be well organised and capable of working independently, and also be keen and ready to co-create and share with other members of the team. Practical experience in national administrations working on bioeconomy policies would be an advantage. A background, or qualifications, in a mix of the following fields would be an asset: environmental, social or political sciences, biotechnology, life cycle assessment, primary production (agriculture, fishery, forestry), or other fields, relevant for the bioeconomy.
